

# Helping Residents **Grow & Thrive**

Parker Place Living Centers will operate *Intermediate Care Facilities for Individuals with Intellectual Disabilities*. These specialized facilities are commonly referred to as ICF-IIDs, and they are designed to provide residential care for individuals unable to live independently.

We believe that individuals with intellectual disabilities who are not able to live at home deserve to live in a facility that provides a homelike environment in which they may learn, grow, and thrive. **The ultimate goal of Parker Place Living Centers will be to enable our residents to reach optimal levels of physical, intellectual, social, and vocational functioning that each unique resident is presently or potentially capable of reaching.**

PARKER PLACE  LIVING CENTERS

Individuals with Intellectual Disabilities*

## Our Programs

We will be dedicated to providing programs where individuals interact directly with the community as often as appropriate and desired by our residents. Many ICF-IID residents work in the community with support, or participate in vocational or other activities outside of the residence, and engage in community interests of their choice.

Other various outside activities include, but are not limited to, participating in civic organizations, volunteering throughout the community, trips to local museums, the Wichita Mountain Wildlife Refuge, the Aquarium, Medicine Park, local parks and gardens, attending religious services of choice, as well as entertainment trips such as going to the movies, bowling, eating out at various restaurants. We will also encourage our residents to participate in the Special Olympics and other special community events specifically for individuals with intellectual disabilities.

## Amenities

We will strive to provide an environment which feels like home and offers the following amenities to our residents:

- 16 private bedrooms
- Comfortable shared kitchen and living spaces with porches
- Resident transportation
- Activities and educational experiences: daily living skills, technology and vocational skills
- Local entertainment and educational experiences throughout the community
- Dedicated staff on duty 24/7

We will assist residents to learn about such opportunities including:

- Participation in civic organizations
- Volunteering throughout the community
- The option to attend religious services

Our strategy to maximize the success of this project will include a strong focus on creating a **unique, safe, homelike environment**, hiring competent and caring staff, and maintaining consistent and compliant policies, procedures, and programs.
